

wherein said viewing, adding, or modifying further comprises:

- selecting a client;
 - selecting one or more matters in connection with the selected client, wherein the one or more matters comprise a group of matters;
 - selecting a component in connection with the selected group of matters;
 - selecting a filter for filtering items for the selected client, matters and component;
 - displaying the filtered items to a user;
 - selecting a user;
 - displaying only items for which the selected user has been designated; and
- wherein said configuring and said viewing, adding, or modifying are performed via an Internet web site.

- SUB C37
15. (Amended) A software program for implementing a website by which documents can be shared between a service provider and a client, the software program comprising:
- instructions for accessing a repository, the repository for storing a plurality of documents;
 - a first graphical interface by which a first user associated with the service provider can log into the network application, can add one or more documents to the repository, and can assign a category, an authorization, and a matter for each document, wherein the matter conceptually links a plurality of related documents and information associated with the matter is applicable to each of the plurality of documents;
 - instructions for identifying one or more clients, each client comprising one or more users having a level of authorization with respect to matters of the client;
 - an email interface linked to the first graphical interface, the email interface including a list of potential email recipients selected according to at least one client, the category and the matter;
 - a second graphical interface by which a second user associated with a client can log into the network application and can access one or more of the documents in the repository, based on the category, authorization, and matter for the one or more documents; and
 - instructions for allowing the second user to view, add, or modify any one of the documents in the repository according to the authorization of the second user with respect to a particular matter.
